SPRING SUMMER 2021

COLLECTION

Santini

Santini

The Santini 2021 Spring/Summer collection, made with pride in our factory in Bergamo, Italy, was inspired by summer rides; the beauty of a warm sun on your back, winding country roads, lush mountain climbs, and the sweet, satisfying fulfillment you get from a hard ride. Summer rides are the best of life itself.

The color palette reflects the broad skies, lush greenery, ripe vineyards, and scenic roads of Northern Italy. The designs are vivid and unique. The fabrics and construction are innovative. And every item is backed by the four promises we make to all our customers; that each garment will fit exceptionally, perform perfectly, provide comfort no matter how often you ride, and be the most durable cycling kit you own.

Summer Comfort 37

Our 2021 Spring/Summer men's collection is a fresh take on cycling design, an exciting iteration of our best-selling summer kits that offers you a premium clothing experience during your epic summer rides. The look of the collection is inspired by Italy itself; a bold palette of new colorways that allows us to share the beauty of our home country. Colors that evoke the thriving urban hum of the streets of Milan and Rome, the depth and clarity of the oceans that surround much of the country, the lushness of the mountains to the north, and the amazing beauty of our open countryside. The colorways allow you to mix and match; simply select a bib, jersey, vest, and accessories from any of the kits in the collection to complete a look for those perfect summer days.

Redux

Speed is in the details

Built for the pro-minded cyclist, our streamlined and ultra-high-performance REDUX kits feature aggressive aerodynamics and a defining, soft feel. The REDUX name comes from our desire to reduce, reduce, reduce (weight, aero drag, details, design elements). We use woven fabrics that enable us to make lighter kits with better thermal regulation and a lower friction/drag coefficient. Our most-advanced clothing-construction techniques, like laser-cut, concealed rear pockets, thermo-sealed seams, one-piece, raw-cut bib braces, and an upgraded leg grippers, give REDUX a minimalist, pared-down design for a super-clean aesthetic. When the riding gets serious, REDUX helps you take your cycling to the next level.

Sleek Pro Performance

As hot as summer itself

If your 2021 cycling plans include serious training, an epic granfondo, or a season of racing, the Pro Performance family of kits was designed for you. With bold designs and high-visibility details, all jerseys, bibs and speedsuits are slim-fitting, high-performance, and comfortably aero. Made from modern, technical textiles that are designed to fit tight to the body yet still hold up to the rigors of training and racing, Pro Performance kits are a striking option for Summer that is the ideal blend of high-performance and classic Santini durability.

Summer Comfort

Classic Italian fit, unrivaled comfort

Not every cyclist wants to squeeze themselves into the tightest-fitting garment possible. With classic Italian fit and Santini style and durability, KARMA, COLORE and CUBO kits are for those of us who ride purely for the love of cycling. Maintaining the Santini commitment to performance and durability, we make no compromises on materials, using lightweight performance fabrics we know to stand up to repeated wearing and washing. We also give our Summer Comfort kit family cyclists our latest, foam-core chamois. We take care of the details so you can ride unencumbered.

Sleek Pro Performance

Pro-style, aero performance

Our race-proven Pro Performance kits are the definition of high-performance cycling clothing for women. Originally tailored to the needs of our sponsored pro riders, the Pro Performance kit family for women highlights Santini's focus on aero performance clothing. These women's kits fit you like a skinsuit to reduce drag, are built with details that lock the kit in place once you put it on, and are performance-enhancing (in a clean way). Featuring inspired graphics from our 2021 women's color palette, our Pro Performance line is bold options for spring and summer, and the kit choice for our Women's World Tour team partners.

Summer Comfort

Classic fit, unrivaled performance

Classic Italian fit with Santini style and durability, GIADA and COLORE kits are for women who ride for the love of cycling; fashion-forward kits for the woman who wants performance and durability in their cycling clothing, but with a softer, more comfortable fit. When you can ride your bike and forget about what you're wearing as a result of the garment's efficiency, we've done our job.

SS21 BASELAYERS

Protection during rides isn’t limited to the fabric on the outer layer of your cycling kit. Adding a simple baselayer under your jersey can extend the comfort of your ride exponentially. On cools morning, grab a few extra degrees of warmth with our thermal baselayers. On the hottest days, look to our sleeveless and a short-sleeve baselayers to draw moisture away from your skin and add a cooling air barrier between you and the elements.

Lieve extra light Baselayer

CODE: BM 002 GLL LIEVE

PERFECT FIT
Elongated cut to provide maximum coverage avoiding a bulky feel when worn under bibs

EXTREME LIGHTNESS

FOR WOMEN

No cycling kit is complete unless the gloves, socks, and cap match the bib and jersey, so we built an entire accessory collection from our 2021 men and women's color palettes. Every piece is designed to allow you to mix and match with the collection's jerseys, bibs, and vests. Complement or contrast, Santini accessories are ready to complete your look for those beautiful summer rides.

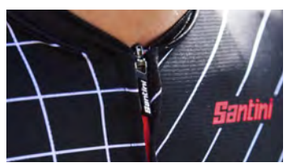
REDUX TECHNOLOGY

Built for the pro-minded cyclist, our streamlined and ultra-high-performance REDUX range feature aggressive aerodynamics and a defining, soft feel. We use woven fabrics that offer greater weight reduction, thermal regulation, and friction/drag reduction. Our most-advanced clothing-construction techniques, like laser-cut, concealed rear pockets, thermo-sealed seams, one-piece, raw-cut bib braces, and an upgraded leg gripper, give REDUX a minimalist, pared-down design for a super-clean aesthetic.

REFLECTIVE DETAILS

Safety on the road is a priority for us. All the 2020 collection products feature reflective details to make you visible on the road even in the darkest hours. All our reflective elements are either incorporated in the product design or beautifully applied to the garment.



CAM-LOCK ZIP

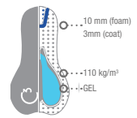
All the zippers we employ feature a cam lock zip closure. The technology protects you from pulling down your zipper inadvertently. When the pull is down it locks the zipper in place. To open the zipper simply raise the pull and unzip (or zip). See the full tutorial video on our youtube channel (How To - Use a Cam Lock Zipper).

UV PROTECTION UPF FILTER

Most of the fabric we use for our summer garments have a high UVA/UVB (UPF 30) resistance to protect your skin while ensuring comfort and breathability.

C3

C3 is an endurance high performance chamois, ideal for long hours in the saddle. The C3 chamois is constructed by using an innovative process called Carving. This special technique allows the pad maximum shock protection, incredible lightness, breathability, and perfect fit because it adheres better to the body allowing freedom of movement. The Rooted Gel located in the ischium (sit bones) area allows for neutralization of vibration when the pad is under stress.



RIDE DURATION

SECTION VIEW

NAT

NAT is a chamois dedicated to those seeking maximum protection with a reduced thickness and size. NAT is made by assembling layers of multi density foam that enclose the innovative ultra-light Tower Gel by Nicolini, which is 40% lighter and 60% more flexible than the usual seat-pads' gel inserts. The structure of this gel is made of small "towers" of different sizes, bigger in the ischiatic areas for a higher shock absorption. The Tower structure enhances the breathability and flexibility of the chamois, making it incredibly comfortable even for long hours on the saddle and very hot days.

RIDE DURATION

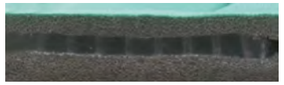
SECTION VIEW

GIT EVO

GITevo is our most versatile gel core chamois. All-round comfort for all types of riding. GITevo is the technological evolution of the original GIT chamois with Twist Gel silicone core that absorbs shock steadily and gradually. GITevo offers added performance with it's new carved construction process that is able to create thicknesses without seams and stitching, reducing the weight and increasing the softness of the padding.

RIDE DURATION

SECTION VIEW



GIL EVO

GILevo is a feminine chamois with an extremely versatile gel heart. All-round comfort for any type of cycling activity. Extremely high performance chamois thanks to the innovative Carving process that is able to create thicknesses without the need for seams or glue. The carving process reduces weight while increasing the softness, elasticity and breathability of the pad.

RIDE DURATION

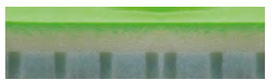
SECTION VIEW

WMAX

WMAX is the essential woman's chamois, perfect for medium distances and indoor activities. The anatomical shape and the perforated foam layer with varying densities make this chamois ideal for all types of indoor activities and for medium distances. No seams come in contact with the skin for extreme comfort and to prevent irritation. Minimal and essential design.

RIDE DURATION

SECTION VIEW



C3W

C3 is an endurance high performance chamois, ideal for long hours in the saddle. The C3 chamois is constructed by using an innovative process called Carving. This special technique allows the pad maximum shock protection, incredible lightness, breathability, and perfect fit because it adheres better to the body allowing freedom of movement. The Rooted Gel located in the ischium (sit bones) area allows for neutralization of vibration when the pad is under stress.

SIZE GUIDE

Wearing the right size is key to have a much better experience on your bike, in terms of comfort and performance. When you ride you don't want distractions. You just want to feel your muscles work, your steady breathing, your heart beating, enjoy the view and think about nothing. Choose the right size following our size guide and consult our fit guide to make sure you get the fit that works for you.

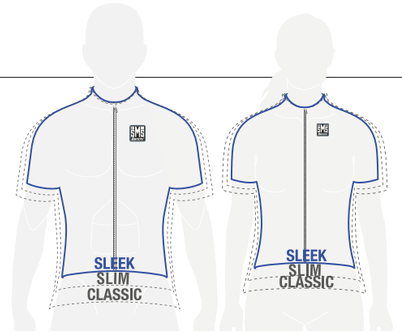
JERSEY FIT GUIDE

While everyone wants their bib-shorts to fit close to the body to perform at their best, how a jersey should fit is a very personal matter. When we develop our collection's tops we do it working on three different fits that define every line within the collection; SLEEK, SLIM, CLASSIC. Have a look at our jersey fit guide below to understand how the different fits work! Remember to check on the product page the FIT icon and to choose your size according to how you want it to fit on your body!

Use this guide to find the fit that is right for you!

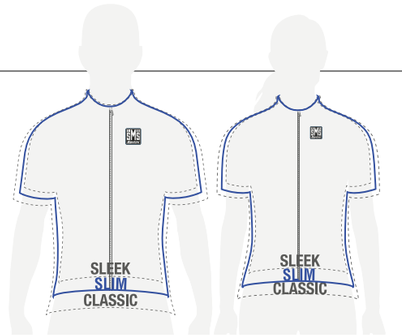
SLEEK "AERO" FIT

Skintight fit, shorter on the front and elongated in the back. Developed with riding position in mind to maximize aerodynamic properties. This is the fit that our pro athletes use for racing. If you like a jersey of our Aero Light range but you prefer a less tight fit, we suggest choosing one size larger.



SLIM FIT

Form fitting jersey. Remains close to the body minimizing wind resistance in the saddle.
This is the fit that defines Santini. Incredibly versatile as it gives you a sleek profile while maintaining incredible comfort throughout your ride.



CLASSIC FIT

Regular fitting jersey. Soft on the body for those who look for a more classic fit.
If you like a jersey of our Everyday-comfort range but you prefer a tighter fit, we suggest choosing one size smaller.
